-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention

3. Claim 1 is indefinite because it is not clear whether the displacement means moves continuously between the four named positions without pausing or stops at each position for an unspecified length of time. Furthermore, it is not understood how “near the conveyor” is different from “over the conveyor”

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fenton (US 4244725).
6. Fenton taught an assembly with a conveyor, a takeout with a takeout arm, supporting means and displacement means and a means for operating the takeout to grip and release formed bottles (see figures, col. 3, line 62 to col. 4, line 56; col. 5, lines 48-58; col. 6, lines 40-63) . The

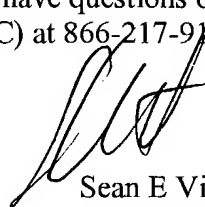

Art Unit: 1731

displacement means of Fenton is described as a "three position" type with an intermediate dwell position at which a bottle is over the deadplate, between the blow station and the Lehr (conveyor). Fenton did not teach a difference between a position near the conveyor and a position over the conveyor. It would have been obvious for a person of ordinary skill in the art to use supporting means and displacement means capable of "four position" movement because it would appear to involve no more than an additional dwell position in the means of Fenton. Furthermore, no dwell time is claimed at the third position, which reads on a continuous movement between positions two and four.

Conclusion

7. The prior art made of record and not relied upon is cited to further show the state of the art.
